BUILT AROUND YOUR BUSINESS

Your ERP. Your rules.

UP TO

80%

user-level customization

Adapt supported business configuration without programming or technical knowledge, using Q-Soft's AI-based architecture.

Forms & fields

Shape supported data-entry screens around your business information.

Layouts & workspaces

Personalize supported working views for different users and roles.

Reports & print layouts

Configure supported output formats and reports for daily operations.

Dashboards & analysis

Use supported designer tools to build useful views of your business.

Business rules

Discuss configurable behavior, validations and process requirements.

Roles & controls

Align supported access and approvals with team responsibilities.

DESKTOP / WEB / MOBILE

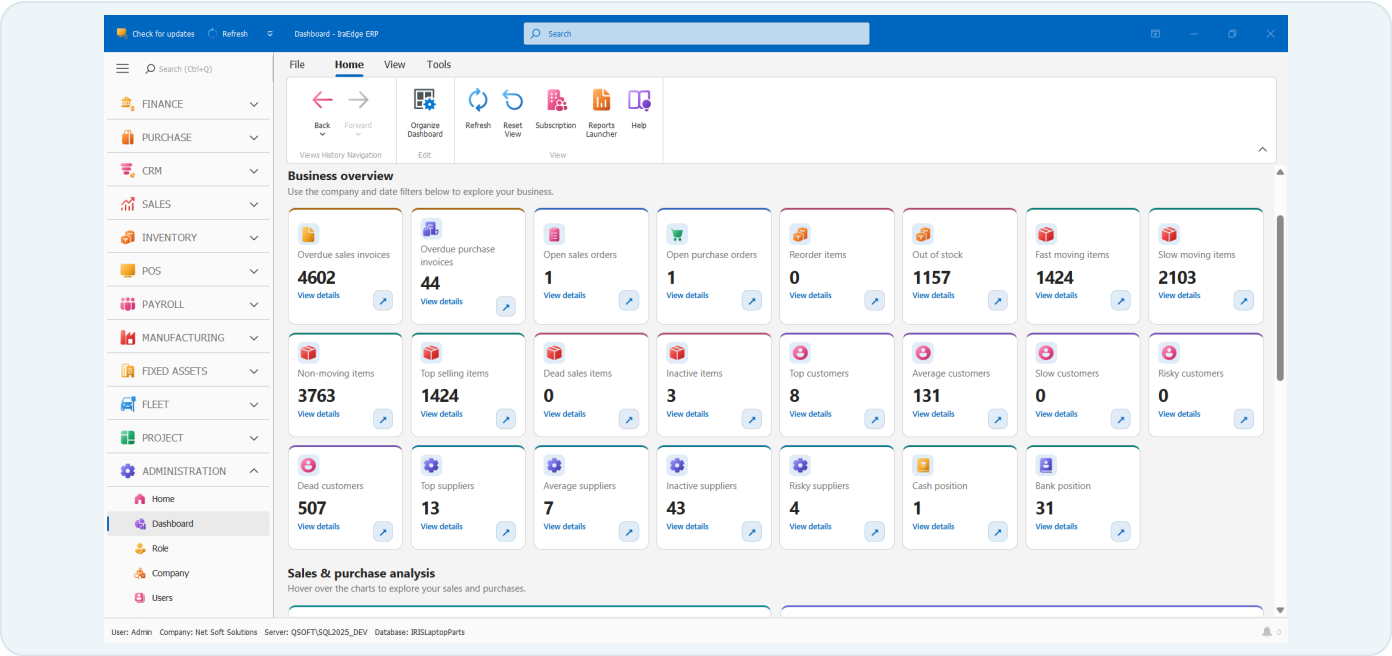

Hybrid ERP connects supported working experiences. Functions, Android/iOS delivery, connectivity and deployment are defined by your selected release and implementation.

The 80% figure applies to eligible configuration, not every possible software change. Validate your use cases and agreed scope during a demonstration.

IRAEDGE ERP / OPERATIONAL DEPTH

Trace every movement. Connect every decision.

Finance, stock, people and production, with adaptable business workflows.

Actual IraEdge ERP business overview. Figures are from the captured application view.

Batch & expiry traceability

Explore batch history, expiry-led stock and FEFO allocation workflows.

Manufacturing workflows

Connect materials, production activity, stock and finance.

Business analytics

Review KPIs and period comparisons with supported dashboard tools.

Connected communication

Explore WhatsApp invoices, payment reminders and order updates.

Next: the 13 IraEdge ERP module areas. Confirm detailed functionality and platform availability in your product walkthrough.

IRAEDGE ERP / 13 MODULE AREAS

Depth across your operations.

A connected catalogue for your product demonstration and implementation planning.

01 Accounting & finance

Daily entries, balances and connected financial statements.

02 Inventory & warehouses

Product records, quantities and warehouse stock movements.

03 Batch & expiry traceability

Batch history, expiry tracking and stock traceability.

04 Procurement & purchasing

Supplier purchasing, receipts, invoices and settlement.

05 Sales & receivables

Sales documents, customer balances and collections.

06 HR & payroll

Employee information, attendance and payroll workflows.

07 Projects & jobs

Project activity, jobs and related business records.

08 Manufacturing & production

Materials, production activity, output and costing context.

09 Point of sale

Retail billing connected with stock and accounting.

10 Tax & invoicing controls

Configured tax detail and invoicing controls.

11 Fuel-station operations

Tanks, dispensers and daily fuel-station activity.

12 Reporting & business intelligence

Business reporting, analysis and management visibility.

13 Administration & approvals

User access, review responsibilities and workflow controls.

Module availability, permissions, integrations and configuration depend on the selected release and agreed implementation.

AIMSEDGE ERP / 18 MODULE AREAS

A broader view of your enterprise.

Connect core transactions with wider enterprise lifecycles.

Actual AimsEdge ERP application screen.

Accounting & finance

Daily entries, balances and financial statements.

Inventory & warehouses

Products, quantities and warehouse movements.

Procurement & purchasing

Supplier purchases, receipts and settlement.

Sales & receivables

Orders, invoices, balances and collections.

HR & payroll

Employee records, attendance and payroll.

Fixed assets

Asset acquisition, location and depreciation.

Projects & jobs

Projects, jobs and related business records.

Manufacturing & production

Materials, production output and costing.

Point of sale

Retail billing linked with stock and accounts.

Budget & spending

Budgets, spending and actuals visibility.

Fleet management

Vehicle records and operational history.

Tenancy & property

Properties, tenancy contracts and rent.

Leasing & installments

Agreements, schedules and balances.

Visitor management

Visitor records, purpose and timing.

CRM & customer care

Customer relationships and follow-up.

Tax & invoicing controls

Configured tax detail and invoice controls.

Business reports and management analysis.

Administration & approvals

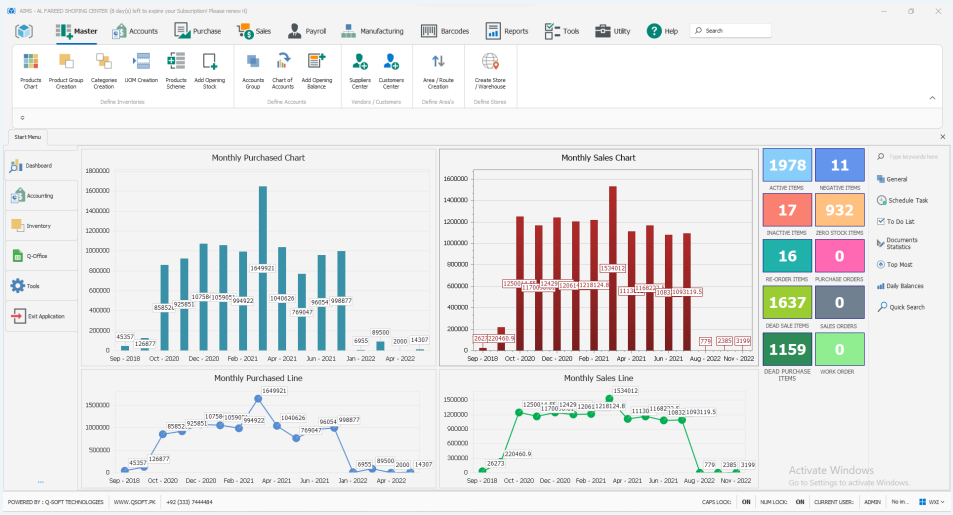

User access, approvals and responsibilities.

Available modules and client functions are confirmed for your selected product release and implementation.

AIMS ERP / CORE BUSINESS

A practical foundation. Clear everyday control.

Standard desktop ERP for accounting, stock and commercial workflows.

Actual AIMS ERP application screen. Confirm modules and configuration in your demonstration.

01 Financial control

Accounts, payments, receipts, balances and financial reporting.

02 Inventory & warehouses

Stock visibility across stores and warehouses.

03 Purchasing

Supplier purchasing, receipts, invoices and settlement.

04 Sales & receivables

Sales transactions, customer balances and collections.

05 Point of sale

Retail billing linked with inventory and accounts.

06 Reports & tools

Business reports, filters and supported exports.

07 Product & account masters

Consistent products, customers, suppliers and locations.

08 Dashboard & daily tools

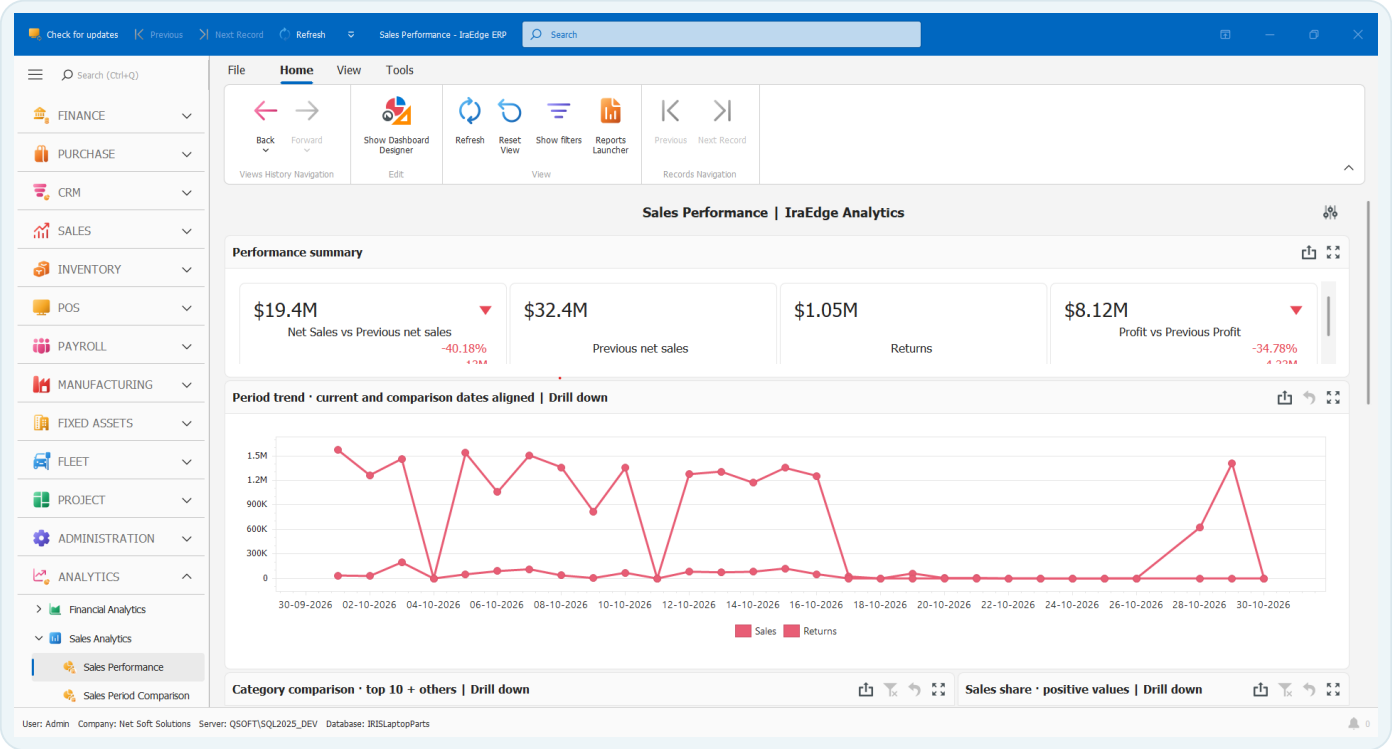

Daily activity, stock conditions and useful working tools.

AIMS ERP is the standard desktop option. Discuss Hybrid ERP separately if your project needs supported web and mobile access.

HIGHLIGHTED FEATURE / BUSINESS INTELLIGENCE

See the detail.
Act on the bigger picture.

From daily financial reporting to visual performance analysis.

Actual IraEdge ERP analytics screen with summary indicators, period trends and designer access.

Design your dashboard

Shape supported dashboards around your business questions. Review relevant KPIs and drill into the available detail.

Compare business periods

Bring current and comparison periods into one view and investigate performance using supported filters.

A REPORTS CENTER FOR DAILY WORK

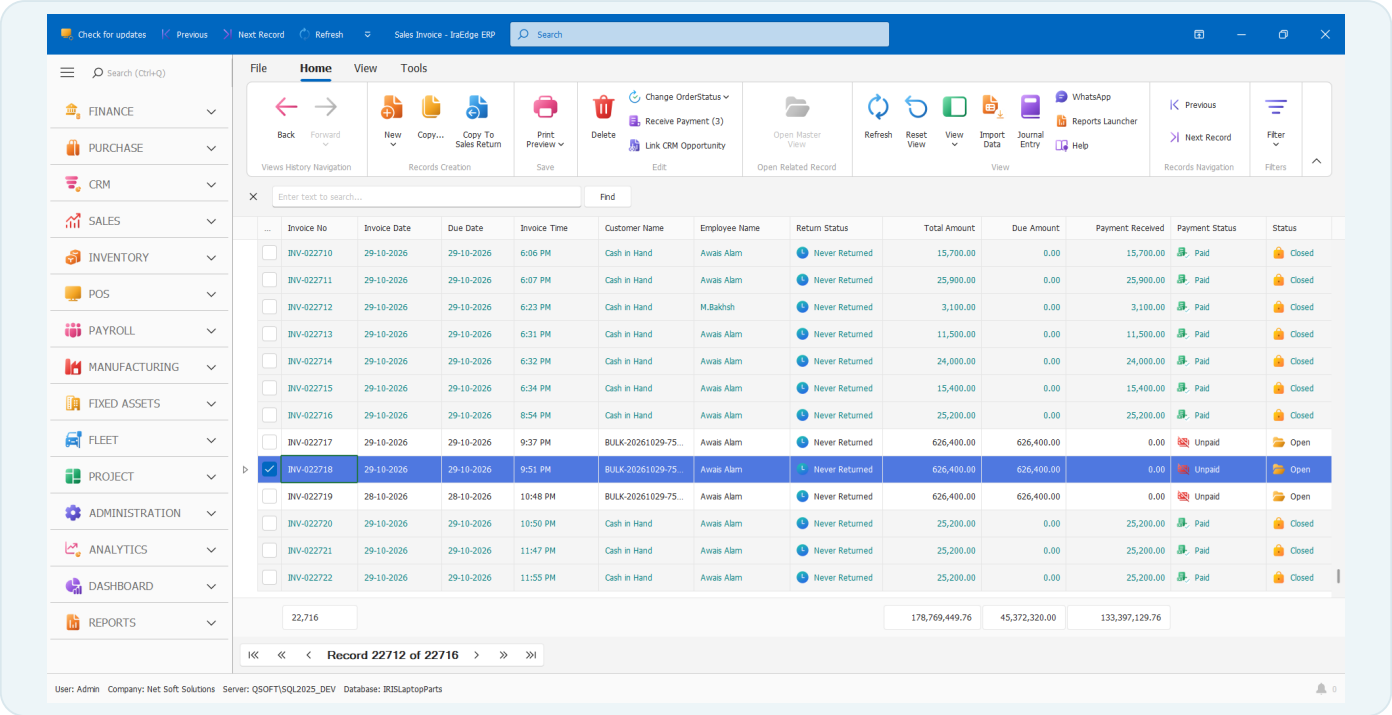

Explore financial and operational reports, categories, search and favourites. Report availability depends on modules, release and permissions.

HIGHLIGHTED FEATURE / CONNECTED WORK

From transaction to customer conversation.

Keep business records and communications close to the work they support.

ORDER > STOCK > INVOICE > PAYMENT

Actual IraEdge ERP sales workspace. A connected business record supports informed follow-up.

WhatsApp workflows

Explore invoice sharing, payment reminders, order updates and customer follow-up in your configured integration.

Business system connections

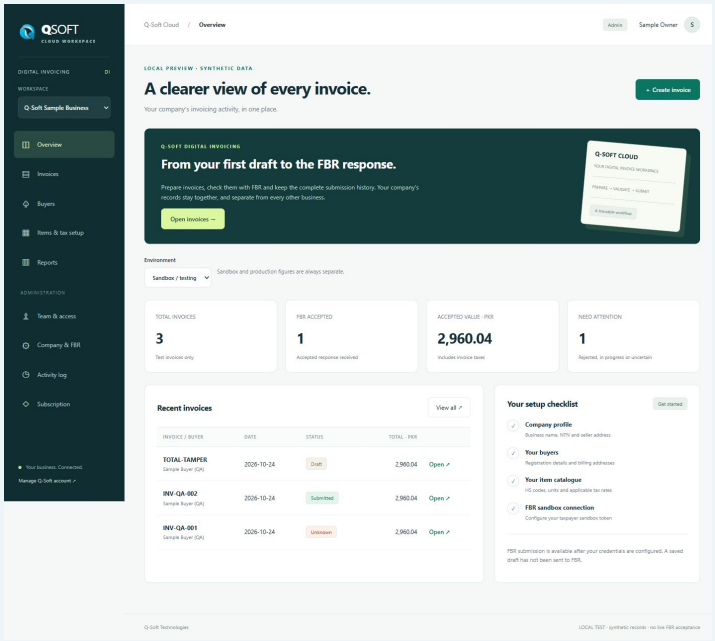

Discuss selling channels, provider access, records to transfer, update direction and automation requirements.

Integrations require provider access and agreed implementation. Messaging, automation and API functions vary by configuration.

Q-SOFT / DIGITAL INVOICING

Prepare. Validate. Submit. Track.

A separate company workspace for browser-based digital invoicing.

Q-Soft Digital Invoicing workspace preview. Confirm current release capabilities in a demonstration.

Company, buyers & items

Maintain company details and reusable buyer and item records.

Invoice lifecycle

Prepare invoices, validate data and review submission history.

FBR responses & QR printing

Track accepted responses and print the issued reference and QR.

Team & company workspaces

Separate company records and manage supported user access.

Imports & reporting

Explore spreadsheet imports, filtering and supported exports.

Trial & subscription plans

Review the current trial, allowances and monthly/yearly plans online.

FBR enrollment, correct transaction data and production authorization are required. This brochure is product information, not tax advice. Current prices and allowances: qsoft.pk/fbr-digital-invoicing/

FROM REQUIREMENTS TO EVERYDAY USE

A clear path to your next system.

Choose the scope together. Prepare your data and people. Validate the workflows that matter.

01

Understand

Map your industry, current systems, users, locations, critical documents and reporting needs.

02

Configure

Agree the product, modules, customization, integrations, deployment and responsibilities.

03

Validate

Prepare sample data, reconcile opening balances, test real workflows and train your team.

04

Roll out

Plan cutover, resolve outstanding issues, confirm access and agree support arrangements.

BRING THESE TO YOUR DEMONSTRATION

Your industry and branches / Expected users / Sample transactions
Key reports / Current spreadsheets / Integrations and platform requirements

YOUR REQUIREMENTS. YOUR NEXT CHAPTER.

Let's build your business around you.

Explore the right ERP foundation, see your workflows in action and agree a practical implementation scope.
